Chas. O. Williford, Prop.

February 26, 1955.

United States Department of Agriculture
Washington 25 D.C.

Gentlemen:

In answer to your letter of Jan 26 1955, I do not put a Catalog or regular price list on trees and seed, as I do all my seed collecting and planting. Seed orders and tree orders are too much for one man to keep up with and still keep up with experimental projects I have started at this time. I collect Sequoia Sempervirens seed in quantities and sell wholesale to retail dealers. In 1954 collected 243 lbs. clean seed, and shipped it. Price \$7.50 per lb. Small orders of seedlings 12 to 20 inches tall sold at \$.35 to \$1.00 per tree according to size and quantity wanted. Some very good orders came from people your department gave my name to. Most people wanted just a few trees, for experiment projects and see what I have to offer. Some turned out to be good customers and order more trees and seed each year.

I wish to thank your department, and to ask you to carry on as in the past.

I am very much interested in giving the Dawn Redwood a chance to live again in the U.S.A. Five years ago I was presented with two small trees, from those two trees we have over 100 trees now, some will be available for sale this Fall, size 20 to 24 inches, can not be shipped bare-rooted. Trees are potted in 1 gallon containers. Price \$10.00 per tree crated F.O.B. Transportation should be done in Winter months. pamphlet inclosed will explain about the Meta Sequoia trees

Yours Very truly

Chas. O. Williford
